

COMPANY PROFILE

SIDAT, spol. s r.o. (Ltd.), was established in 1990 by Czech nationals. It currently has 70 full-time employees and a turnover of 180 million CZK.

Our core business is to supply automation systems for manufacturing and production. This covers processing, transport and storing of gaseous and liquid mediums, and grain and solid materials. Our specialists provide highly professional support in the field of process automation (incl. electrical engineering, instrumentation and control, industrial communications and systems such as HMI/SCADA) as well as manufacturing information/execution systems such as MIS/MES and LIMS.

We have gradually become a highly specialised company focusing on: food & beverage; production of building materials; the chemical, pharmaceutical and oil & gas industry; the automotive industry; waste-treatment facilities and the handling of the nuclear fuel in nuclear power plants.

Furthermore we are an established direct supplier of a wide spectrum of automation components. We stock essential spare parts that are readily available to our customers. Also, our troubleshooting support is both prompt and effective.

Since 1995 our company has been running a Siemens-authorized training centre for participants involved in designing, operating and maintaining the automation systems. To date, these services have been used by over 3000 individuals.

We offer a complete set of customer services: e.g. consultancy; TCO&ROI analysis; engineering design; hardware supplies; application software development and commissioning on site; training customer personnel; after-sale support that includes spare part deliveries and hot-line services, too. Of course all activities concerning the project management are available.

Our services are based on the control, visualisation, communication, design and database software of reputable companies such as Siemens, AspenTech, ProLeiT, Microsoft, Wonderware, Eplan, and others.

Our hardware supplies consist of the systems and components of leading worldwide producers.

Our expertise is reflected in prestigious certificates and partnerships. We are ISO 9001:2009 certified, a Siemens Solution Partner Certified Specialist in PCS7 and MES SIMATIC IT, AspenTech Valued Partner, partner of ProLeiT.

Over the twenty years we have carried out more than 400 automation projects. About 45% of these have been supplies of complete automation systems or their parts for markets in Europe, North and South America and Asia.

Our customers can benefit from the extensive experience and expertise (in automation, technology and project management) we gained in these automation projects. We guarantee reliable cost-optimal solutions and advanced after-sale service.

Among our many customers/end-users, we are proud to have:

AGC/Flat Glass, Behr, Carlsberg, Coca-Cola, ČKD Energo, Danone, Heidelberg Zement, Heineken, ČEZ/Temelín Nuclear Plant (Czech Republic), Kozloduj Nuclear Plant (Bulgaria), KRAFT Foods, Lafarge, Lasselsberger, Lhoist, Maersk Oil Qatar, Nestlé, ORLEN/Unipetrol RPA, ProLeiT, PSP Engineering, SABMiller/Pilsner Urquell, Siemens, StarBev/Staropramen, Škoda JS, Statoil, TMS Linz, TRW, Unilever, Central Waste Water Treatment Plant (Prague), VW/Skoda Auto, Sanofi/ZENTIVA.
